Professional Summary

Detail-oriented and results-driven B.Sc. IT graduate with a strong foundation in Software development and Data analysis. Proficient in Python, Java, JavaScript, and SQL, with hands-on experience in building machine learning models and web applications. Passionate about delivering innovative and scalable solutions to meet business needs, while continuously learning and adapting to emerging technologies.

Technologies and Languages

- Languages: Java, Python, JavaScript, PHP, HTML and CSS
- Technologies: React, REST APIs, Agile, SQL, Django, Pandas, NumPy, Excel, Tableau
- Courses: Data structures and algorithms, Database Systems, Artificial Intelligence, Computer Vision

Education

- **B.Sc. Information Technology**, D.G. Ruparel College, Mumbai. **2024**
CGPA: 6.63

Projects

Weather Forecasting Web Application (JavaScript, Python, HTML, CSS, SQL):

Team Project - Team Leader

- Developed a web application that shows real-time weather forecasts and visualizes weather data. Used HTML and CSS for the front-end layout and design.
- Used JavaScript to fetch weather data from a public API and display it on the webpage. Used Python to process and manipulate weather data if necessary. Store user preferences or location data in a SQL database.

Iris Flowers Detection using Machine Learning (Python, Django, scikit-learn):

Individual

- Developed a machine learning model to classify iris flowers into three species based on petal and sepal measurements.
- Used Python with scikit-learn for data preprocessing, model training, and evaluation. Created a Flask web application to deploy the model and provide predictions to users

Personal Portfolio Website (HTML, CSS, JavaScript, React):

Individual

- Designed and developed a personal portfolio website using HTML, CSS, JavaScript, and React. The website showcases projects, skills, and contact information, and includes a blog section to share technical articles and tutorials.

Certifications

Python for Beginners - Udemy

Supervised Machine Learning: Regression and Classification – Coursera

AI/ML for GeoData Analysis – ISRO
